

SWASYA Aalaya Private Limited

Safe | Sound | Sublime

About SWASYA Aalaya

SWASYA Aalaya Private Limited (SWASYA AALAYA) is a leading company that develops real estate in the realms of Residential, Commercial, Industrial and Agricultural sectors.

SWASYA AALAYA enables its customers to self-own real estate that is sublime, safe & sound in the realms of Residential, Commercial, Industrial and Agricultural sectors.

Strongly believes in the concept **Front-End-Loading (FEL)** in project management. When a project is front-end loaded, it means that you have put a significant effort into the planning or definition phase of the project.

Ultimately, the goal of **FEL project management** is to ensure that you are going to meet the schedule and budget (which determines the ROI) set for the project.

SWASYA FEL Project Management provides a structured approach to development through Opportunity, Concept and Design stages before execution. It ensures informed decision-making, optimized planning, cost estimation and effective construction management for successful project delivery. The costs of inadequate design and definition discovered during execution phase of the project are phenomenally high and can jeopardise the success of the project. This is why principles of front-end planning are so important for us and meticulously implement the projects.

***SWASYA** in Sanskrit means Self-owned, Safe and Sound.*

***Aalaya** in Sanskrit means Home, Abode, and Dwelling.*

***Aalaya** in Arabic also means Noble, Sublime, and Exalted.*
